Gas stoves

Gas stove PG-4D

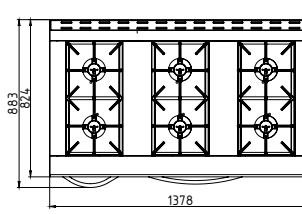

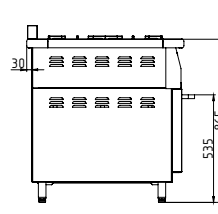

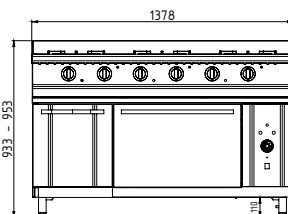

Description:

The stove is equipped with four burners. The capacity of one burner is 3.5 kW. The stove and oven are fitted with electrical ignition and "gas-control" system. The capacity of an oven burner is 6 kW. The oven has 4 levels for baking sheets sized 540x470 mm. The oven automatically maintains the set temperature from 50 to 300°C. The delivery set comprises 2 baking sheets of mild steel sized 540x470x40 mm and a set of jets for different types of gas. The front and upper parts of the stove are made of stainless steel AISI 430, the other parts are made of steel painted with grey resistant paint. The oven is equipped with adjustable legs. The product is supplied assembled on a pallet. Packing is corrugated board and wooden frame.

Service-counter "Self-service buffet", mobile

The frame of elements is made of laminated chipboard coloured "walnut" or "beechwood" and from stainless steel AISI 430. It can be manufactured with natural stone tabletop.

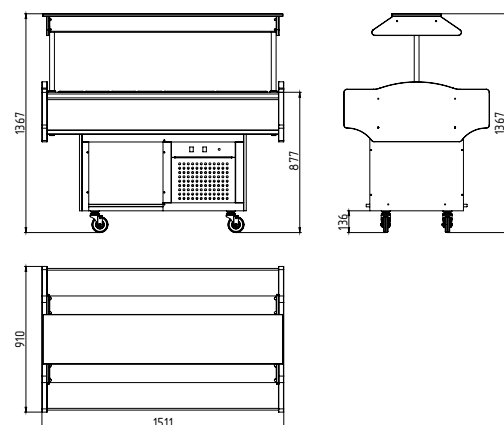

Self-service buffet MEP-2B-SHS

Description:

Equipped with 12 gastronorm pans 150 mm deep. The gastronorm pans are included in the set. Smooth heating temperature is from 0 to 90°C. There is a space for kitchen utensils storage below. The food warmer is equipped with legs adjustable by height. The product is supplied assembled on a pallet. Packing is corrugated board and wooden frame.

Self-service buffet SOEP-SHS

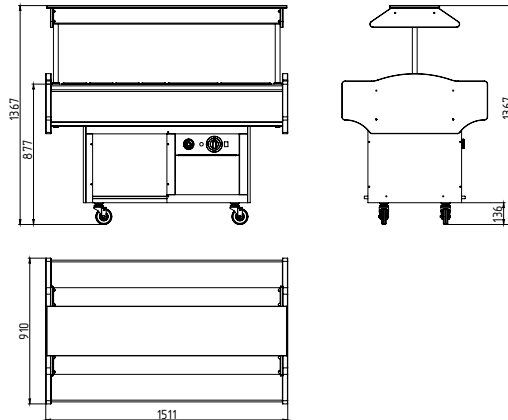

Description:

Equipped with 12 gastronorm pans 150 mm deep. The gastronorm pans are included in the set. Smooth heating temperature is from -1 to +5°C. There is an open space for kitchen utensils storage below. The buffet is equipped with legs adjustable by height. The product is supplied assembled on a pallet. Packing is corrugated board and wooden frame.

Preparation tables

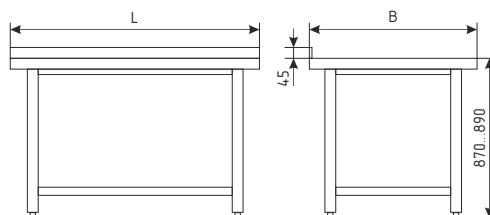

Depending on type and thickness of the tabletop steel and framework material, industrial tables are produced in three series: ECONOM, STANDARD, PROFI. Tables of all series are produced in two variants: island type (without a border) and wall-mounted type (with a border).

Preparation table Series ECONOM

Preparation table SRO (without border)

Preparation table SROb (with border)

Description:

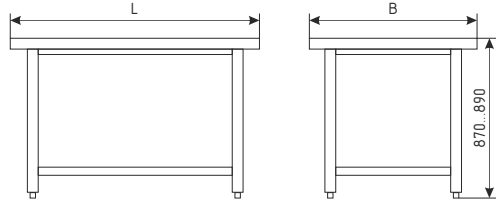

The tabletop is made of stainless steel of grade AISI 430, 0.5 mm thick and additionally strengthened with the laminated chipboard at least 16 mm thick. The table frame is made of galvanized (ECK-series) or stainless (ENK-series) steel angle. The tables are equipped with lattice shelves or optionally with blank shelves of galvanized or stainless steel which are mounted above the lattice shelf. The legs are fitted with screw-type supports enabling table height adjustment from 870 to 890 mm. The product is supplied disassembled. Packing is corrugated board.

Table for collecting food residuals SSOP

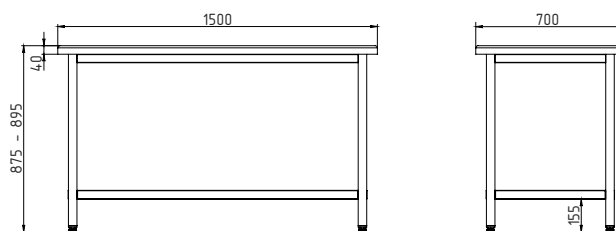

Description:

The table is intended for waste collecting in production premises of public catering facilities. The tabletop is stainless steel AISI 430 0,5 mm. The tabletop can be mounted both with left and with right arrangement of the hole. The frame is painted, demountable, of mild steel pipe 40x40 mm. The legs are fitted with screw-type support enabling table height adjustment from 850 to 870 mm. The product is supplied disassembled. Packing is corrugated board.

CONFECTIONERY TABLE

Confectionery table

Description:

The table is intended for use at public catering facilities for performance of works related to preparation of cookery and flour products. The tabletop is made of solid beechwood 40 mm thickness. The frame is demountable, of mild steel pipe 40x40 mm, painted. The legs are fitted with screw-type supports enabling table height adjustment from 875 to 895 mm. The product is supplied disassembled. Packing is corrugated board.

Washing sinks

Washing sinks are produced with two types of washing capacities: welded capacity and capacity solid-drawn. The solid-drawn capacity has no welded seams, and it considerably facilitates hygienic sink cleaning.

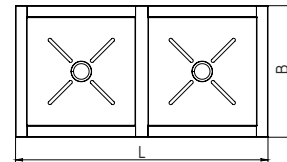

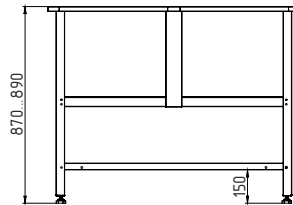

Depending on the type and thickness of steel the washing capacity is made of, washing sinks are produced in three Series: ECONOM, STANDARD, and PROFI. Sinks of ECONOM and STANDARD series are produced with the washing capacity of the welded type, and are not equipped with the wall-mounted border, the sinks of PROFI series are produced only with the solid-drawn washing capacity, can be equipped with the wall-mounted border, have the strengthened frame and the proper site for water faucet installation.

ECONOM Series

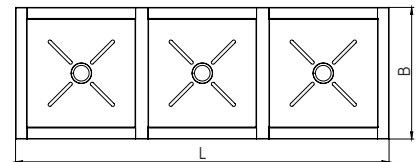

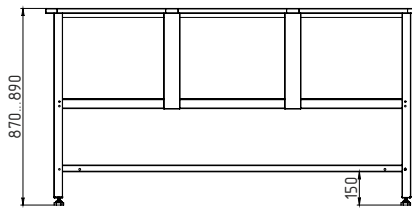

VMO1 (1 section)

VMO2 (2 sections)

VMO3 (3 sections)

Description:

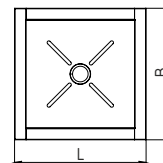

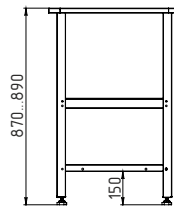

The welded washing capacity is made of stainless steel grade AISI 430 0.5 – 0.6 mm thickness with the hole 52 mm in diameter for siphon drain installation. The sink frame is made of galvanized or stainless steel angle. The legs are fitted with screw-type supports enabling sink height adjustment from 870 to 890 mm. The sink is equipped with the lattice shelf. The product is supplied disassembled. Packing is corrugated board.

Washing sinks - solid-drawn washing capacity

PROFI series

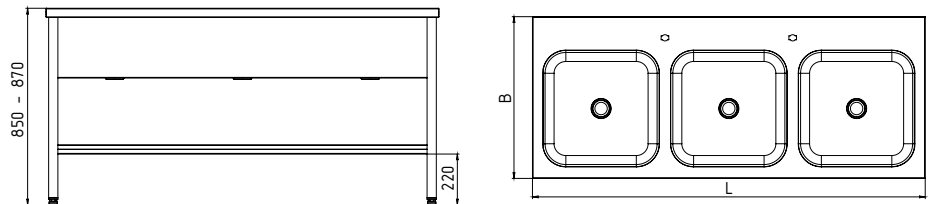

VMOc1 (1 section)

VMOc2 (2 sections)

VMOc3 (3 sections)

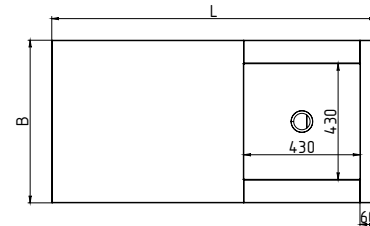

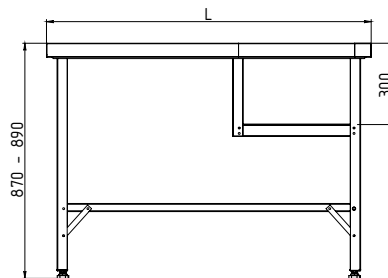

Description:

The solid-drawn washing capacity is made of stainless steel grade AISI 304 1.0 mm thickness. The frame is made of stainless steel grade AISI 304. There is a hole 52 mm in diameter for siphon drain installation. The tabletop is equipped with the proper site for water faucet installation. The sink can be fitted with the wall-mounted border. The frame is made of pipe (square section, 40x40 mm). The legs are fitted with screw-type supports enabling sink height adjustment from 850 to 870 mm. The product is supplied disassembled. Packing is corrugated board.

Washing sinks with the work space - welded washing capacity

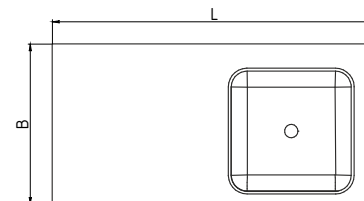

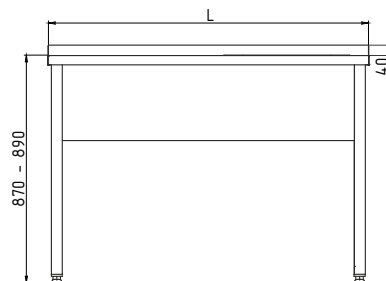

Description:

The welded washing capacity is made of stainless steel grades AISI 430 or AISI 304 0.8 mm thickness. There is the hole 52 mm in diameter for siphon drain installation. The tabletop is made of stainless steel of grade AISI 430, 0.8 mm thickness and is additionally strengthened with the laminated chipboard at least 16 mm thickness. The table frame is made of galvanized steel angle. The legs are fitted with screw-type supports enabling table height adjustment from 870 to 890 mm. The product is supplied disassembled. Packing is corrugated board.

Washing sinks: pan washing sink - welded washing capacity

Description:

The welded washing capacity is made of stainless steel grades AISI 430 0.8 mm thickness. There is the hole 52 mm in diameter for siphon drain installation. The table frame is made of painted mild steel angle. The legs are fitted with screw-type supports enabling table height adjustment from 870 to 890 mm. The sink is equipped with the lattice shelf. The product is supplied disassembled. Packing is corrugated board.

KITCHEN RACKS

Kitchen racks depending on the frame type are produced in three Series: ECONOM, STANDARD, and PROFIL.

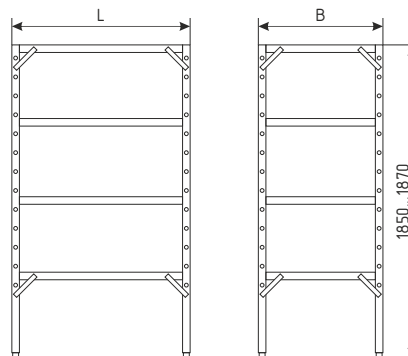

Kitchen Rack SKK Series ECONOM

Description:

The frame is made of galvanized steel angle. The shelves are made of stainless steel grade AISI 430 depending on products series, available thickness is 0.5 or 0.8 mm. Rack posts have fastener holes for shelf installation at any height needed. The rack has legs adjustable by height. The product is supplied disassembled. Packing is corrugated board.

Kitchen Rack SKN Series STANDARD

Description:

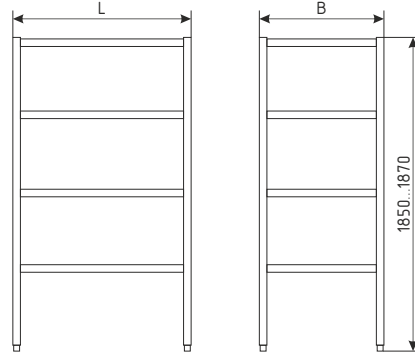

The frame is made of stainless steel angle. The shelves are made of stainless steel grade AISI 430 depending on products series, available thickness is 0.5 or 0.8 mm. Rack posts have fastener holes for shelf installation at any height needed. The rack has legs adjustable by height. The product is supplied disassembled. Packing is corrugated board.

Glass Drain Rack

The racks are used for draining of plates and glasses. According to installation type, can be divided into two types: floor and wall-mounted. Depending on the frame type, the drain racks are available in two series: ECONOM and STANDARD.

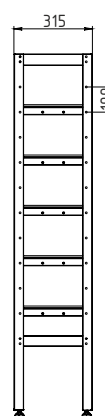

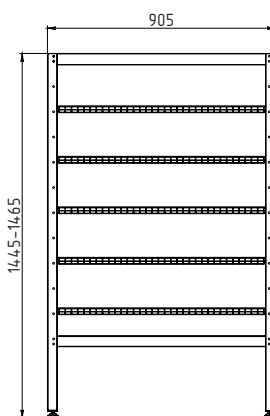

Glass Drain Rack wall-mounted, 2 shelves

Glass Drain Rack wall-mounted, 3 shelves

Glass Drain Rack floor-mounted, 5 shelves

Description:

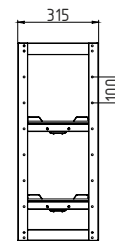

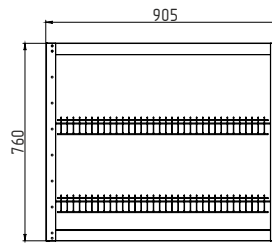

The frame is made of galvanized or stainless steel AISI 430 angle. The shelf is made of chrome-plated steel lattice. Under the bottom shelf, a stainless steel tray is mounted to collect liquid. The floor-mounted rack has legs adjustable by height. The product is supplied disassembled. Packing is corrugated board.
